REMARKS

In the specification, Applicants update the priority claim of this application and correct typographical errors that, in part, correspond to corrections made in earlier-filed U.S.S.N. 09/300,657 to which this application claims priority.

Applicants submit herewith an annotated marked-up drawing for Figure 8A for the application. The annotated marked-up drawing includes additional reference number information. The amended paragraph of the specification adds the reference numbers to the corresponding text. Support for these amendments can be found in the text of information Figure 8A, and in other portions of the application. Applicants submit that no new matter is added to the application by these amendments. Applicants respectfully request approval and entry of these amendments to the figure and to the specification.

Applicants also enclose formal drawings for the Official Draftperson's review to replace the informal drawings (and the annotated marked-up informal drawing for Figure 8A with the changes marked in red) submitted herewith.

Applicants respectfully submit that no new matter is introduced by the amendments herein.

Respectfully submitted,
